AMENDMENTS TO THE CLAIMS

1-60. (Canceled)

61. (Currently Amended) A non-transitory computer-readable recording medium recording multimedia contents data ~~having~~ in the form of a data structure that represents operations as a chronological sequence managed by a schedule describing unit, which is processed in a data processing device that includes a reproducing unit for reproducing media data and an inputting unit for receiving an input operation from a user, said non-transitory computer-readable recording medium further comprises:

the schedule describing unit for managing time of effect of said media data that is reproduced in said reproducing unit of said data processing device and time of effect of said input operation that is received by said input unit, ~~and which includes~~:

a reproduction describing unit for ~~showing~~ reproducing the media data ~~that is reproduced~~ in said reproducing unit of said data processing device in accordance with said chronological sequence; and

an input operation describing unit for ~~showing an input~~ receiving a predetermined editing operation ~~that is received~~ by said inputting unit of said data processing device at a predetermined time in accordance with said chronological sequence and performing an editing process that corresponds to said ~~input~~ predetermined editing operation; and

~~a schedule describing unit for managing time of effect of said media data that is reproduced in said reproducing unit of said data processing device and time of effect of said input operation that is received by said input unit~~, wherein

said multimedia contents data is processed so that predetermined media data is reproduced in said reproducing unit of said data processing device at a predetermined time on the basis of said schedule describing unit, a predetermined input operation is received by said inputting unit of said data processing device at said predetermined time, and said data processing device carries out a process that corresponds to said predetermined input operation at said predetermined time on the basis of said input operation describing unit, and

said reproduction describing unit resuming processing of said multimedia contents in accordance with the chronological sequence.

62. (Currently Amended) The non-transitory computer-readable recording medium recording multimedia contents data ~~having a data structure~~ according to claim 61, wherein said process that corresponds to said ~~input~~ predetermined operation received by said input unit of said data processing device is a process for adding ~~a change~~ media data to be reproduced at said predetermined time in accordance with said chronological sequence~~said multimedia contents data~~.

63. (Currently Amended) The non-transitory computer-readable recording medium recording multimedia contents data ~~having a data structure~~ according to claim 62, wherein said process for adding said ~~change to said multimedia contents data~~ media data is a process for replacing a portion of said media data in said chronological sequence in said data structure for said multimedia contents data.

64. (Currently Amended) The ~~non-transitory computer-readable~~ recording medium recording multimedia contents data ~~having a data structure~~ according to claim 62, wherein said process for adding said ~~change to said multimedia contents data~~ media data is a process of adding media data, that is obtained by replacing a portion of said media data in said chronological sequence in said data structure for said multimedia contents data ~~to said contents data~~.

65. (Currently Amended) The ~~non-transitory computer-readable~~ recording medium recording multimedia contents data ~~having a data structure~~ according to claim 62, wherein said process for adding said ~~change to said multimedia contents data~~ media data is a process for adding media data, that is obtained by replacing a portion of media data in said chronological sequence in said data structure for said multimedia contents data in a predetermined subsequent process ~~to said multimedia contents data~~.

66. (Currently Amended) The ~~non-transitory computer-readable~~ recording medium recording multimedia contents data ~~having a data structure~~ according to claim 61, wherein said ~~multimedia contents data is data that is described in~~ data structure is in accordance with a script language.
